Introduction

15on1 promises it's viewers 15 guys and 1 girl in every scene for some wild and kinky action. The members area unfortunately does not live up to the promise this site's tour makes.

Adult Review

The tour of 15on1 says: "As you can probably tell by our domain name alone we find one hot model, fuck them 15 times with 15 different cocks and spray loads of cum all over their bodies!"

The reality is that 15on1 is a streaming site that provides viewers with a total of (15) sex scenes in its archives. The action often includes less than 15 guys and gets even further off course as more than 1/3 of the updates include 2 girls instead of 1. Most of the time 15on1 is actually more like 9on2.

The actors in the scenes do not speak English. The video is average quality (640x480) in most updates but the sound quality is below what it should be. While watching the movies it appeared most were older non-exclusive content nowhere near as clear and crisp as the tour lead us to expect it would be.

The site does not include picture sets and video can not be downloaded so when your membership ends you will not have access to any of the content on the site any longer. Scenes are offered as "full movie" streams or smaller segments in both high and low quality.

Strangely, none of the updates shows the date when it was added which makes it difficult at best for The Tongue to determine how often this site updates, but with only (15) total videos in its archives it definitely is not going to keep you busy for more than one month even if it updates weekly from now on.

The best thing about the site is that it includes a large number of other sites on the same network as part of your membership but the included sites are only about as good as this one is. So essentially you are getting a lot of marginal content from a bunch of sites instead of the kind of quality content this site's tour specifically promises to you.

Porn Summary

The site does not give you what the tour promises. The videos are nothing special and the lack of frequent updates suggests it will not improve much any time soon.
